

Shoot! Looks like an extension like Privacy Badger or DuckDuckGo Privacy Essentials is blocking the embed from my video host, Vimeo. You'll have to disable or lighten up your settings for this domain to continue watching. Sorry for the trouble!

Don't worry, I'm not doing any shady stuff, it's just that in order to restrict my videos to being embedded on this domain, Vimeo has to set a cookie for it to work and an extension you are running is blocking that from happening.

```
44 <div data-key="76" class="key">
45 <kbd></kbd>
46 <span class="sound">tink</span>
47 </div>
48 </div>
49
50 <audio data-key="65" src="sounds/clap.wav"></audio>
51 <audio data-key="83" src="sounds/hihat.wav"></audio>
52 <audio data-key="68" src="sounds/kick.wav"></audio>
53 <audio data-key="70" src="sounds/openhat.wav"></audio>
54 <audio data-key="71" src="sounds/boom.wav"></audio>
55 <audio data-key="72" src="sounds/ride.wav"></audio>
```
